

CS 88

Corner Loaded Dual 8"
700 Watt Powered Subwoofer

NO STANDING WAVES = GREAT BASS

Pinnacle has developed the first subwoofers specifically designed, both acoustically and visually, for corner placement. Our exciting new CS 66 and CS 88 corner loaded subwoofers feature an innovative sloping front baffle design, enabling them to virtually obliterate standing waves, resulting in deeper, cleaner bass. The "wedge shaped" cabinetry allows the subs to fit inconspicuously in any corner of the room, and comes finished in a beautiful, heirloom quality Black or White Diamond™ piano gloss, certain to suit any décor.

The **CS 88** features two 8" front firing woofers and our state of the art high powered 700 Watt amplifier, capable of delivering stunning bass volume and depth. These potent attributes rival much larger systems that depend both on much bigger woofers and cabinets.

Special Features

- Non-parallel Walls Eliminate Standing Waves
- Beautiful Black or White Piano Gloss Finish
