

SubSonic

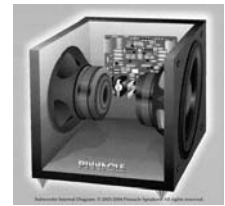

Ultra Compact 6.5"
Bipole Powered Subwoofer

WARNING:
Don't Let the Size Fool You!
These Small Subs Produce Great Bass!

Only 9" Cube!

Sit back, relax, and enjoy deep authoritative and convincing bass from our incredibly tiny **SubSonic** subwoofer. The SubSonic is a diminutive 9" cube that shatters previous performance boundaries of micro-sized boxes. You no longer need to compromise by choosing between superb bass response or a visually discreet, unobtrusive product. Most potent subwoofers are housed in physically large boxes that encroach on living space. Not so with the SubSonic. We achieve spectacular results with our proprietary subcompact amplifier design mated to a bipole pair of specially customized 6.5" woofers.

SubSonicTechnology
